Description

You can play the P-48 Pelican as a Stormstrike with two 500 Kg Bombs able to wreck pretty much any target they land on or you can play the P-48 Pelican as a Thunderstrike with its two rocket pods that, while more accurate, deal a little less damage but can annihilate an area if you chose to use the "Volley" special rule.
Perfect for surgical strike and to support your ground offensives, the P-48 will strike fear in your opponent's heart as he watches it devastate its targets to open the way to victory.

Miniatures come pre-assembled, primed and unpainted. (but ready to play!)
