Description

Equiped with Nebelwefers, the Axis Lothar provides mobile artillery to any Axis force. Devastating against infantry and able to catch multiple target under its attack, the Lothar needs anti-tank support as its rockets are pretty weak against enemy vehicles and walkers (although it can cause some serious damage to light vehicles). Thanks to the 'Artillery' special rule, its weapons can be fired under the control of Artillery obersvers (see: Special Ops Grenadiers) without having to expose itself and/or it can also fire smoke shells to provide cover to your advancing forces.

Miniatures come pre-assembled, primed and unpainted. (but ready to play!)
