Description

In the wake of Germany's invasion of Stalingrad, where hundreds of thousands of soldiers had been lost or grievously injured, the Axis leaders turned to the extremes of science. From the labs of the Blutkreuz Korps comes a horrific solution: Wiederbeleben Serum. When this elixir is injected into the corpses of fallen soldiers, it not only reanimates them but grants them incredible resilience. With the Axis Zombies, the Axis now has plenty of new troops for the front lines.

Despite their simple minds, the Blutkreuz Korps needs these undead soldiers to focus on only one objective, annihilating the enemy. With their Fast ability, the Axis Zombies can easily close in on their targets. Allied commanders will need to adapt quickly to these new enemies as they are both mindlessly fearless and sometimes appear impervious to gunfire.
