

Iron Dwarves Kraken Class Sub

When this little beauty hits an enemy model it certainly lets itself be felt. The submarine lowers itself in the water, not quite submerged, and a ram rises up out of the water that is slammed into the hull/body of a model. The engine room of this vessel gets called upon to give it 150% when a ram is about to take place. The dwarves are expected to generate a sudden burst of speed that allows the model to slam into an enemy model with all of its might, ripping a giant hole in it. 1 model per blister. Please note that Uncharted Seas models do not ship with stat cards or any other printed materials. Updated rules and statistics will be available from the 'Downloads' section of the Spartan Games website. Our models are made from either resin, pewter, or a combination of the two. Models supplied unpainted and unassembled. Some preparation work may be needed before assembly. We recommend that resin models are washed before painting.
