Description

Fragile but deadly, the Ground Attack Helicopter makes your opponent regret not taking more anti-aircraft in his list. Able to be armed in four configurations, the Ground Attack Helicopter can drop bombs, fire rockets or simply heavy canons and finish whatever survived (if there 's any survivors to the onslaught) with fire from its quad DSHK.
The Ground Attack Helicopter requires finesse to survive but if played right can devastate entire areas of the battlefield all by itself.

Miniatures come pre-assembled, primed and unpainted. (but ready to play!)
