Description

SSU's heroes are what one would expect from the Sino-Soviet Union: they lead by exemple. Red Yana is an Infantry Ace that will get any infantry squad she joins to outdo themselves. Yakov, equiped with the flamethrower is less likely to lead a charge than Red Yana but should be one of your first choice when it comes to defending a building to the end. Nikolai is your prime choice when it comes to tank-battle as he makes any vehicle he joins much more accurate.

Miniatures come pre-assembled, primed and unpainted. (but ready to play!)
