Description

This Kit can be played either as one Karl Marx heavy Tesla battle tank able to reliably damage any ground target and stun them to make sure that if they survived they cannot make a sustained attack or as the Lavrentiy Beria, a more conventional tank with less firepower against enemy super-heavies and no Tesla rule but a cheaper point cost and a flame-thrower built in the hull.
Both tanks have the 'Damage Resilient' rule making them hard to get rid of.

Miniatures come pre-assembled, primed and unpainted. (but ready to play!)
